To automate this process, you can choose a configuration in VS Code so that your files are automatically formatted when you save. For demonstration purposes, here is the example code you will format: `const name = "James"; const person = {first: name } console.log(person); const sayHelloLinting = (fName) => { console.log(`Hello linting, ${fName}`) } sayHelloLinting('James');` If you are familiar with the code format, you may notice some mistakes: A mixture of single and double quotes. You can spend more time solving difficult technical problems instead of fighting for solved problems like code bleeding. As part of this work, I have found that Visual Studio Code is extremely useful in other ways as well, as a very powerful text editor with many features that you can find in other advanced text editing tools. Set Editor: Default format for esbenp/prettier-vscode. Create a new file named .prettierrc.extension with one of the following extensions: Here is an example of a simple configuration file using JSON: { "trailingComma": "es5", "tabWidth": 4, "semi": false, "singleQuote": true } s details about the configuration files, see the Prettier documents. Here is a simple example showing how to create an empty file and paste it into some JSON text. Step 4 Create a nicer configuration file If you change the configuration of your VS code, someone else might have a completely different configuration on your machine. You may or may not like the optional parenthesis surrounding the arrow function parameter. This is the same map of keys to auto-format other languages as well, so I often find myself doing CTRL-A (to select all text) followed by ALT-SHIFT-F to fix my messy C# code after a series of cut and paste operations. Things Prettify ugly JSON inside VSCode Installation Install via the package manager. Note: If you do not see an indication to select a default format, you can change it manually on your eht evas uoy nehv dettamrof yllactamotua eb lliw ti dna lausu sa edoc ruoy etirw nac uoy ,tes si siht eenO :dekcehc si noitpo taht erus ekam dna evaS nO tamroF :rotidE rof hcraes ,nepo si unem eht ecnO ,devolvni si edoc yna fi sselldrager AAAe selft txeht htw gnikrow nehv esu l loot yramirp eht sa edoC oidutS lausIV esu won l ,os hcum oS ,citamotua ssecorp eht sekam dna gnittamrof edoc ruoy ni ycnetsisnoc serusne reitterP ,edoc ruoy tamrof ot ti egarevel won nac uoy ,dellatsni noisnetxe reitterP eht htw dnammoc tmemucoD tamroF eht gnisU AAAe l petS :ereh nwohs nottub llatsninu eht fo daetsni nottub llatsni na ees lIAAAeuoy ,emit tsrif eht rof ti gnillatsni erAAAeuoy fi .tnemucoD tamroF esoohc neht dna tamrof rof hcraes ,ettelap dnammoc eht ni .si edoc NOSJ eht eht demrof-llew woh htw od ot seussi xif uoy pleh ot loot eht esu nac uoy woh swohs osla noitamina eht ,elif ni txeht elohw eht tamrof ot smia tl) :siht ekil .selur gnittamrof emas eht swollof rebmem maet yreve taht erusne nac uoy ,tcejorp ruoy otni ti gnikcehc dna eseht fo eno gnitaerc retfA ,LMTH dna ,NOSJ ,tpircSepyT ,tpircSavaj rof srettamrof tuafed sah sah edoC SV :etisbew sti ni syas edoC oidutS lausIV saA TIM esnecl ,F-TFHIS-TLA si NOSJ detceles eht tamrof-otua ot pam-yek eht ,tresni ot bat a tnaw uoy secaps ynam woh yficesP - htdiW baT ,unem sgnites eht nepO ,selft SSC no skrow osla siht ;)semaj(gnitmlolleHyas } ;) }emanH(\$,gnitmlolleH ,gol.elosnoc { ,> = }emanH = gnitmlolleHyas tsnoc ;)nosrep(gol.elosnoc ;) eman :tsrif { = nosrep tsnoc ,semaj } = eman tsnoc :setouq tnetsisnoc dna ,gnipparw onil ,gnicaps htw dettamrof won si edoc ruoy ,ctc stekcarb gnissim sa hcus AAAe fletsi NOSJ eht fo eructarts eht htw seussi yitnedi ot ro ,elbadaer erom ti ekam rehtie ot txeht NOSJ tamrof otua ot si lulpleh dnif l ralucitrap ni ksat enO ,edoc SV sa nwonk osla ,edoC oidutS lausIV ni edoc ruoy tamrof yllactamotua ot reitterP pu tes lIAAAeuoy ,elctra siht ni Join our DigitalOcean community of over one million free developers! Conclusion Having a consistent code is a good practice. The first property of the person object must be on its own line. The console instruction inside the function must be indented. The keyboard shortcut: [Ctrl] + [May] + i brings formatted text. Semi & Choose whether or not to include periods and comma at the end of the lines. Prerequisites To follow this tutorial, you will need to download and install Visual Studio Code. For example: body { color: red; } h1 { color: purple; font-size: 24px ; } It will be reformatted as: body { color: red; } h1 { color: purple; font-size: 24px; } Now that we've explored this command, let's see how I can implement it to run it automatically. This command will make your code more consistent with the formatted spacing, line encapsulation, and quotation marks. You can set a consistent format across your computer by creating a configuration file for your project. Step 2 "Format Code in Save Until now, you have had to manually run a command to format your code. To work with Prettier in Visual Studio Code, you will need to install the extension. Step 3 A: Changing the Prettier Configuration Prettier does a lot of things for you by default, but you can also customize the configuration. Depending on the JSON, the file will automatically detect that it is tmemucoD tmemucoD tamroF le odnasu somerolpxe ,razepme araP ,ahcered roirefmi anisue al ne odatse ed arrab al odnazilitu amoidi le recelbatse atisecen o ,NOSJ sodad noc My latest articles have focused on using Visual Studio code to generate a series of scripts to help manage Analysis Services data models. The disadvantage of using the built-in configuration menu in VS Code is that it doesn't & ensure consistency between developers on your team. The keyboard shortcut is: [Ctrl] + k then [Ctrl] + f Alex Weininger - Nov 16 '21 Ziad Mubaraq - Nov 6 '21 Formatting the code consistently is a challenge, but modern development tools make it possible to automatically maintain consistency across the base computer. of A code. You can convert something with incoherent blood, keys, new lines and semicolon to correctly formatted code. To do this, look for Prettier - Code Formatter in the VS Code extension panel. This will show all the settings you can change: Below are some of the most common settings: Single quote - Choose between single and double quotes. Once these check boxes are activated, you get the option to Open Codes to Do by clicking with the secondary button on a file or folder in Windows Explorer. To change this setting, press COMMAND + , on macOS or CTRL + , on Windows to open the Settings menu. Next, you will be asked to choose the format you want to use. Agreeing on a set of configurations helps readability and understanding of the code. To do this, click on the Configure button: Next, select More Beautiful - Code Formatter. This also ensures that the code does not & check on version control that does not & have formatted. It is particularly beneficial when working on a project with multiple partners. Then look for Prettier. Press F1 or "cmd+shift+p" and type install, then type Prettify JSON and press enter. Well, there's also of parts in the selected text. To open the command palette, you can use COMMAND + MAYA S + P on macOS or CTRL + MAYA S + P on Windows. Windows. Windows.
